

Supplementary Notes

The following list includes those cultivars that did not appear in the checklists or the 2003 Register or have since been registered or have appeared elsewhere, as well as further information on certain listed cultivars. For older hybrids, the Passiflorunde checklist (Ref. 1) should be consulted if the correct crossing direction is required; this was not shown in the 2003 Register. The inclusion of a name in this list does not imply that it is necessarily an acceptable name under the provisions of the International Code of Nomenclature for Cultivated Plants (2004).

Named by breeder Myles Irvine in honour of John Vanderplank's 'Star of' hybrids. 2003 Register incorrectly describes flowers as being like *P.* 'Star of Bristol' whereas they are white with pale coronal filaments with blue tips.
